Education

PCET's Nutan College of Engineering and Research **Sep. 2020 – Jun. 2024**
B.Tech in Computer Science; CGPA: 8.73 *Pune, Maharashtra*

Technical Skills

Languages: CPP, JavaScript, Java, Python

Developer Tools: Git, GitHub, Postman, VS Code

Technologies: ReactJS, NodeJS, Springboot

Business Tools: MS Excel, JIRA, NICE CXone

Experience

Johnson Controls **Dec 2025 – Present**
Junior Solution Architect, *Pune, Maharashtra*

- Designed and implemented scalable cloud-native voice solutions integrating AI-powered features like **Copilot for agents**, enhancing productivity and call resolution efficiency.
- Led architecture and deployment of event-driven and serverless workflows, integrating enterprise platforms such as NICE CXone, Cognigy, and Five9.

Johnson Controls **Jan 2025 – Nov 2025**
IT Analyst, *Pune, Maharashtra*

- Engineered and maintained automation scripts and workflow logic within NICE CXone Studio, optimizing call routing, intent handling, ticket lifecycle management, and agent assist workflows.
- Built and integrated RESTful APIs to connect contact center platforms with backend services, enabling seamless data exchange between NICE CXone, Salesforce (SFDC), and internal systems.

Johnson Controls **Jun 2024 – Dec 2024**
Graduate Software Engineer, *Pune, Maharashtra*

- Administer and maintain **NICE Cxone** systems, ensuring optimal performance and reliability.
- Develop and maintain **Studio scripts** to automate **workflows** and improve system functionality.
- Work closely with cross-functional teams to support ongoing projects and initiatives, contributing technical expertise.

Projects

SentinelAI – AI-Driven Cybersecurity Threat Detection

- Architected a real-time AI-powered threat detection system leveraging anomaly detection and event-driven cloud architecture. Implemented a Ripple Network Model to propagate threat intelligence across distributed services

VPC with public-private subnet in Production | *VPC, EC2, Load Balancers, Bastion host*

- Implemented a **multi-AZ** AWS VPC architecture with public/private subnets for load balancers and **server separation.**
- Integrated **Auto Scaling** for dynamic server provisioning based on demand, improving **resource utilization** and cost.
- Used **NAT gateways** within public subnets to grant private servers **secure**, controlled access to the internet for essential outbound traffic.

StudentGradeRegistry | *Rest API, Springboot, Postman, MySQL*

- Designed and implemented a **REST API** for a grade and coursework management for students, leveraging Spring Boot functionalities to seamlessly interact with MySQL database
- The API empowers students to **access**, **submit**, and **manage** grades and courses with ease.

Achievements

- Smart India Hackathon 2022 – Finalist.
- Received Best Innovation Award – Inter-College project competition.

Patent/Paper

- Published Patent with the title "WEB3NEXUS - NEXTGEN WEB APP NETWORK. (July 12, 2024)
- Research paper with title "Exploring Blockchain Solutions for Enhancing Trust in IOT environments: A survey"

CURRICULUM VITAE

Yashi Ajay Dubey

Pune, Maharashtra, India

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering
PCET's Nutan College of Engineering and Research, Pune, India
September 2020 – June 2024
CGPA: 8.73 / 10.0

- **Ranked 1st in First Year (FY)** across the **Computer Science & Engineering department**, based on cumulative academic performance.
- **Relevant Coursework:**
  Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Artificial Intelligence, Software Engineering

Higher Secondary Education (Class XII)
SNBP Junior College, Pune, Maharashtra
Year: 2020 | **Percentage: 82.46%**

Secondary School Education (Class X)
Priyadarshani High School, Maharashtra
Year: 2018 | **Percentage: 85.60%**

TECHNICAL SKILLS

- **Programming:** Python, Java, C++, JavaScript
- **Core CS:** Data Structures, Algorithms, OOP, Database Systems
- **Backend & Systems:** RESTful APIs, Spring Boot, Node.js
- **Cloud (Foundational):** AWS (VPC, EC2, Load Balancers)
- **Tools:** Git, GitHub, Postman, Linux (basic)

PROFESSIONAL EXPERIENCE

Johnson Controls — Pune, India

Junior Solution Architect (Rotational Role)
December 2025 – Present

- Selected for a **rotational Junior Solution Architect role after approximately one year of full-time industry experience**, reflecting early trust in system-level and architectural responsibilities.
- Contributed to the design and implementation of **cloud-native, event-driven contact center solutions**, supporting large-scale enterprise deployments.
- Worked on integration of **AI-powered agent assistance features** aimed at improving call handling efficiency and agent productivity.
- Participated in architectural discussions involving **distributed systems, API orchestration, and platform interoperability** across enterprise ecosystems.

IT Analyst
January 2025 – November 2025

- Designed and developed **automation workflows** within NICE CXone Studio to improve call routing logic, intent handling, and ticket lifecycle management.
- Built and integrated **RESTful APIs** to enable data exchange between contact center platforms, Salesforce (SFDC), and internal backend services.
- Assisted in monitoring, troubleshooting, and optimizing production workflows in live enterprise environments.

Graduate Software Engineer
June 2024 – December 2024

- Supported administration and maintenance of enterprise-grade NICE CXone systems, ensuring system reliability and performance.
- Developed and enhanced automation scripts for production workflows under guidance from senior engineers.
- Collaborated with cross-functional engineering and operations teams during system updates and deployments.

PROJECTS

SentinelAI – AI-Driven Cybersecurity Threat Detection System

- Designed an **AI-assisted threat detection framework** leveraging anomaly detection techniques and event-driven cloud architecture.
- Implemented a **Ripple Network Model** to propagate threat intelligence signals across distributed services in near real time.
- Focused on scalable architecture design, low-latency event processing, and intelligent alert dissemination.

Production-Grade AWS VPC Architecture

- Designed and implemented a **multi–Availability Zone AWS Virtual Private Cloud (VPC)** with public and private subnets.
- Configured Load Balancers and Auto Scaling groups to support fault tolerance and variable traffic demands.
- Implemented NAT Gateways to enable secure outbound internet access for private instances.

StudentGradeRegistry – Backend REST API System

- Designed and implemented a **RESTful backend application** using Spring Boot and MySQL for managing student grades and coursework.
- Developed secure and well-structured API endpoints to support CRUD operations and database interactions.
- Emphasized clean backend design and maintainability.

RESEARCH, PATENTS & PUBLICATIONS

- **Patent:** *"WEB3NEXUS – NextGen Web App Network"*, published July 12, 2024
- **Research Paper:** *"Exploring Blockchain Solutions for Enhancing Trust in IoT Environments"*

ACHIEVEMENTS, HACKATHONS & DISTINCTIONS

- **Smart India Hackathon 2022 – Finalist**
  - Developed a **digital document management interface for seafarers**, conceptually similar to DigiLocker, tailored for **marine and ocean-related identity cards, certifications, and official documents**.
  - Focused on secure access, centralized storage, and ease of verification for maritime authorities and personnel.
- **Finalist – Johnson Controls Innovation Challenge**
  - Proposed and developed an innovative enterprise solution aligned with business and technology objectives.
- **Best Innovation Award**, Inter-College Project Competition
- **Academic Rank 1 (FY B.Tech)** – Computer Science & Engineering Department

ADDITIONAL ACTIVITIES

- District-level **Karate Player** during school years.
- **Elementary and Intermediate Drawing Examination** holder (B+ Grade).

ACADEMIC INTERESTS

Artificial Intelligence, Distributed Systems, Cloud Computing, Secure Backend Systems

---

ADDITIONAL INFORMATION

- **Intended Degree:** Master's (MS / MSc)
- **Preferred Intake:** Fall (September)
- **Availability:** Full-time
